Academic positions and affiliations

- 2026.10 - **FWF Erwin Schrödinger Fellow**, *Academic Guest*, ETH Zurich, Seminar for present Applied Mathematics (SAM), Department of Mathematics (D-MATH), Zurich, Switzerland.
Host: Prof. Habib Ammari
- 2024.02 - **Research Scientist**, Johann Radon Institute for Computational and Applied Mathematics, Austrian Academy of Sciences, Linz, Austria.
2026.09
Mentor: Prof. Mourad Sini
- 2021.07 - **Postdoctoral Fellow**, Institute of Applied Mathematics, Academy of Mathematics and Systems Science, Chinese Academy of Sciences, Beijing, China.
2024.01
Mentor: Prof. Bo Zhang

Education

- 2016.07 - **PhD in Mathematics**, School of Mathematical Sciences, Peking University, Beijing, China.
2021.06
(Supervisor: Prof. JianSheng Yang)
- 2012.09 - **Bachelor in Mathematics**, School of Mathematics and Statistics, Xidian University, Xi'an, China.
2016.07

Research Interests

- Wave propagation and resonance phenomena in complex and structured media
- Inverse Problems for partial differential equations and imaging

Publications

Preprints

- 14 Huaian Diao, Long Li and Mourad Sini, Interface-shifted Minnaert resonances, arXiv:2609.37423.
- 13 Huaian Diao, Long Li, Mourad Sini and Qilong Zhai, Eigenvalue Asymptotics in High-Contrast Media, arXiv:2608.30721, submitted to SIAM Journal on Applied Mathematics.
- 12 Long Li and Mourad Sini, A time-domain pressure–interface model for gas bubble dynamics with surface tension: well-posedness, classical limits, and resonance branches, arXiv:2607.06064, submitted to Mathematical Models and Methods in Applied Sciences.

- 11 Long Li and Mourad Sini, High contrast transmission resonance for the Lamé system, arXiv:2601.10290, submitted to Journal of Functional Analysis.

- 1 Long Li, Guanghui Hu and Jiansheng Yang, Interface with weakly singular points always scatter, *Inverse Problems* 34 (2018), 075002 (13pp).

Selected Grants and Fellowships

- | | |
|---------------------|---|
| awarded 2026 | Subwavelength resonances in coupled acoustic-elastic systems, FWF Erwin Schrödinger Fellowship, Austrian Science Fund (FWF), Grant No. J 5102-N. (Host: ETH Zürich; return phase: RICAM, Austrian Academy of Sciences). |
| 2022.11–
2024.01 | Uniqueness and efficient reconstruction algorithm for inverse scattering problems in a two-layered medium, Principal Investigator, Grant No. 2022M720158a, China Postdoctoral Science Foundation (first class). |

Teaching Experience

- 2020.03-07 **Teaching Assistant**, Advanced Mathematics B, Peking University.
- 2018.09-2019.01 **Teaching Assistant**, Advanced Mathematics B, Peking University.
- 2017.09-2018.01 **Teaching Assistant**, Design and Analysis of Algorithms, Peking University.
- 2017.03-07 **Teaching Assistant**, Advanced Mathematics C, Peking University.

Invited Talks

- 2026.08 High-Contrast Transmission and Fabry–Pérot-Type Resonances, Isaac Newton Institute for Mathematical Sciences, Cambridge, UK.
- 2025.09 Long-Time dynamics of acoustic resonators and applications in inverse problems, the 2025 ÖMG–DMV Annual Meeting, Linz, Austria.
- 2025.07 Uniform space and time behavior for acoustic resonators, the 3rd HKSIAM Biennial Conference, HongKong, China.
- 2025.02 Uniform resolvent estimates for subwavelength resonators, the 3rd Conference on Mathematics of Wave Phenomena, Karlsruhe, Germany.
- 2023.10 Piecewise-analytic interfaces with weakly singular points of arbitrary order always scatter, the 21st Annual Conference of the China Society for Industrial and Applied Mathematics, Kunming, China.
- 2023.07 Direct imaging methods for reconstructing locally rough interfaces from phaseless total-field data, the 13th Chinese Conference on Computational Mathematics, NanJing, China.
- 2021.10 Imaging of buried obstacles in a two-layered medium with phaseless far-field data, the 19th Annual Conference of the China Society for Industrial and Applied Mathematics, Hefei, China.

Honors and Awards

- 2021 **Outstanding Graduate of Peking University**.
- 2016-2021 **Peking University President Scholarship for Doctoral Students**, awarded for five consecutive academic years.
